

## **fishing gill net catalog**

### **19' X 10'GILL NET -FLAG TYPE- FISHING - FISH - SURVIVAL**

**US \$12.99 <http://stores.ebay.com/MULLETT-3S-THE-EVERYTHING-STORE>**

This is A new flag or shirt tail gill net 19' long and 10+' deep, the mesh are # 210D/2-2LP-----2 7/32 square and 4 7/16 stretched, it is hung 3/16 braided nylon # 12 green bonded nylon twine ( I use tarred or bonded cord as the knots will hold better ) and hung on 12" centers, this net is very light weight and designed to catch 1 1/2lb. up to 3 to 5 lbs., it can be used in salt or fresh water but the water must be still, it is the by far the easiest net to use and will catch more fish than any other fish as the fish do not have to hit it, just swim near it and swim off, the motion from their tail causes the bottom of the net to come up and surround them, just hang it between 2 stakes and adjust it to the depth you want it and catch fish also this net will fit into A common Wal-Mart grocery bag. I do not recommend this net for persons who do not have experience using nets or removing fish from nets. If you need a longer or shorter net please e-mail me. I am 71 years old and have been living in the Fla. panhandle all my life and have been hanging and using all kind of nets and will be adding more I have A 50' one I will list soon. I try to describe all of my items as correctly as possible but if you are not satisfied with item please e-mail through ebay contact as I guarantee all my items unless otherwise stated

### **50' X 4' GILL NET - 2 SQ.MESH- FISHING / SURVIVAL**

**THIS IS A VERY LIGHTWEIGHT NET THAT WILL BE GREAT FOR CATCHING FISH FOR BAIT OR FOOD. GREAT FOR SURVIVAL KITS, -I USE 100' OF NETTING TO HANG 50' NETS & 50 OF NETTING TO HANG 25' NETS**

I hung this net to meet some states requirement of 200 sq.ft. This is A new flag or shirt tail gill net 50' long and 4' deep, the mesh are app. 2" square and 4" stretched, The netting is # 139 nylon hung on 3/16 braided nylon with # 12 green bonded nylon twine ( I use tarred or bonded cord as the knots will hold better ) and hung on 12" centers, this net is very light weight it has no floats and only a top line with no line on bottom and designed to catch 1 lb. and larger fish, it can be used in salt or fresh water but the water must be still, it is the by far the best catching net made. =I build my nets small and lightweight, some of them you can carry in your pocket but they do catch fish like no other net, and will also catch birds and animals but that is another story--it is like a large spider web hanging from the top of the water with the sides and bottom not attached to anything. The water must be still. A fish swims into the net. The net pushes forward and clings to the sides of the fish with almost no resistance. When the fish finally feels resistance, the net is clinging to both sides, the fish turns and effectively folds itself into the net with no real

harm to it. A gill net can easily be fished by one person, but can easily catch more fish than that person can eat. These nets are very popular in some parts of the country for catching yellow cat, mud cat, shovelhead cat, johnnie cat, goujon, appalachion, opelousas or flathead cat. Gill nets are also very popular in the New England area for catching menhadden, bunker or shad for bait for large predator fish such as yellow catfish.,in the south for catching carp, suckers and catfish in fresh water and flounder, mullet and trout in salt water. I am 70 years old and have been living in the Fla. panhandle all my life and have been hanging and useing all kind of net-.I try to describe all of my items as correctly as possible but if you are not satisfied with item please e-mail through ebay contact as I guarantee all my items unless otherwise stated

## **25 X 6 GILL NET - 1 1/4 SQ. MESH FISHING - SURVIVAL**

THIS IS A VERY LIGHTWEIGHT NET THAT WILL BE GREAT FOR CATCHING SMALL FISH FOR BAIT OR FOOD. GREAT FOR SURVIVAL KITS.I USE 100' OF NETTING TO MAKE A 50' NET AND 50' OF NETTING TO MAKE A25' NET.

This is A new flag or shirt tail gill net 25' long and 6' deep, the mesh are app.1 1/4square and 2 1/2 srtched,The netting is # 69 nylon and is hung on 550 lb.test parachute cord with # 12 green bonded nylon twine ( I use tarred or bonded cord as the knots will hold better ) and hung on 12" centers, this net is very light weight and designed to catch 1/2lb.up to 2 to 3 lb.,it can be used in salt or fresh water but the water must be still,it is the by far the best catching net made.=I build my nets small and lightweight,some of them you can carry in your pocket but they do catch fish like no other net, and will also catch birds and animals but that is another story--it is like a large spider web hanging from the top of the water with the sides and bottom not attached to anything. ---

**NET INFORMATION**

I ordered my net from

THE FISHNET COMPANY

Nets are listed in their catalog and website in 300 ft lengths intended for commercial use. A custom order is required to get the net made smaller for recreational use. Here is the catalog number and description. Ask for Billy when you call. ITEM # LGM-6617

- Monofilament
- 50ft x 6ft (Custom Cut Length)
- 3.5" Stretched Mesh
- 3/8" Float Rope On Top
- Leaded Core Rope On Bottom
- Current Price Should Be Around \$50.

\* 4" stretch mesh is illegal to use from Jan 1st through March 25. The above net is legal throughout the year.
